PROFESSIONAL SUMMARY

Platform Engineer, Cloud Engineer, and Site Reliability Engineering (SRE) with 14+ years of experience designing, building, and operating cloud-native platforms on Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). Proven record of delivering large-scale cloud migrations, Kubernetes modernisation, platform engineering, and reliability programs for systems serving more than 10 million users. Experienced in leading engineering teams of 20+ people, delivering 30+ cloud transformation projects, and reducing infrastructure costs by up to 35% while sustaining 99.9% service availability. Open to relocation and international opportunities.

KEY ACHIEVEMENTS

- 14+ years across Software Engineering, Platform Engineering, Cloud Engineering, and Site Reliability Engineering (SRE).
- Led and mentored 20+ engineers across Platform Engineering, SRE, DevOps, and Software Development.
- Delivered 30+ cloud transformation and modernisation projects across multiple industries.
- Engineered and operated platforms serving more than 10 million users at 99.9% availability.
- Reduced cloud infrastructure costs by up to 35% through FinOps governance and optimisation initiatives.
- Executed a cloud-to-cloud migration of 3 TB+ of production assets with minimal downtime.
- Established enterprise observability platforms covering metrics, logs, traces, and application performance monitoring across 20+ services and 15+ engineering teams.

SKILLS

Cloud Platforms	AWS, Google Cloud Platform (GCP), Microsoft Azure, Cloudflare, Multi-Cloud Architecture
Platform Engineering & SRE	Platform Engineering, Site Reliability Engineering (SRE), Kubernetes, CKA (renewal in progress), High Availability, Disaster Recovery, Incident Management, Capacity Planning, Service Level Indicators / Objectives (SLI/SLO), Reliability Engineering
Infrastructure as Code CI/CD & GitOps	Terraform, AWS CloudFormation, Infrastructure as Code (IaC), Automation Engineering GitHub Actions, Jenkins, Azure DevOps, Argo CD, GitOps, Deployment Automation
Containers & Orchestration	Kubernetes, Docker, Helm, Docker Compose, Docker Swarm
Observability	Prometheus, Grafana, Loki, Fluent Bit, OpenTelemetry, Tempo, SigNoz, New Relic
Databases	PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Neo4j
Programming Languages	JavaScript, TypeScript, Node.js, Shell Scripting, Python (familiar)
Web Technologies	React.js, Next.js, REST APIs, Microservices, Distributed Systems

PROFESSIONAL EXPERIENCE

Co-Founder & Platform Engineer

SentinelFox Pvt Ltd · Chennai, India · Jan 2022 – Present

- Founded and scaled a cloud consulting and platform engineering company, delivering 30+ cloud modernisation projects across multiple industries.
- Achieved and maintained AWS Partner status, delivering 30+ certified cloud projects across multiple industries and customer environments.
- Built and led a cross-functional team of 20+ engineers spanning Platform Engineering, Site Reliability Engineering (SRE), Cloud Engineering, and Software Development.
- Engineered multi-cloud platforms across AWS, Microsoft Azure, and Google Cloud Platform (GCP) supporting workloads serving more than 10 million users.
- Migrated production infrastructure across AWS, Microsoft Azure, and Google Cloud Platform (GCP), including Kubernetes clusters and \$10K+ monthly billing workloads, with zero major service disruption.
- Designed and operated multi-cloud architectures spanning cloud boundaries – including cross-cloud observability setups (Azure Monitor + Prometheus/Grafana on AWS) – ensuring unified visibility across distributed production environments.
- Executed a cloud-to-cloud migration of 3 TB+ of application assets with minimal downtime and no major service disruption.
- Migrated legacy virtual-machine (VM) workloads to Kubernetes and designed highly available platforms using Horizontal Pod Autoscaling, multi-zone deployments, and automated recovery.
- Led FinOps governance initiatives reducing cloud infrastructure costs by up to 35% through rightsizing, autoscaling, Reserved Instance planning, and tagging policies.
- Implemented Infrastructure as Code (IaC) standards with Terraform and AWS CloudFormation, reducing provisioning effort by more than 70% within 2 months of rollout.

- Built GitOps-driven deployment pipelines using Argo CD, GitHub Actions, Jenkins, and Azure DevOps, reducing manual deployment effort by 80%.
- Built end-to-end observability using OpenTelemetry, Prometheus, Grafana, Loki, Tempo, SigNoz, and New Relic, covering 20+ microservices across 7+ customer environments, and established incident management processes covering on-call rotations, blameless postmortem culture, and error budget tracking across 15+ engineering teams.
- Led DevSecOps programs covering vulnerability remediation, compliance hardening, and cloud security governance – resolving 50+ CVEs across 10+ customer environments and establishing security baselines aligned with CIS benchmarks.
- Defined engineering standards, cloud governance practices, and reliability objectives across customer platforms.

Senior Software Engineer

Nextwave Multimedia Pvt Ltd · Chennai, India · Nov 2017 – Dec 2021

- Engineered backend systems and distributed platforms supporting more than 10 million active users at 99.9% availability.
- Designed and developed multiplayer gaming backends supporting up to 10K concurrent players with real-time communication and state synchronisation.
- Re-engineered the tournament platform (live scoring, rankings, and leaderboards) to launch and configure tournaments directly from the backend with artifacts served via S3/CDN – eliminating the per-tournament app release previously required for each new tournament and enabling many public and private (invite-only) tournaments to run in parallel.
- Led migration of legacy PHP applications (200K+ lines of code) to a Laravel-based architecture, improving response times by 60% – reducing average API response time from ~800ms to ~320ms.
- Implemented continuous integration and continuous delivery (CI/CD) pipelines, reducing build and release time from 1hr to 5min.
- Improved application performance through MySQL query optimisation and database architecture enhancements, reducing average query time by 90%.
- Established reusable engineering frameworks and coding standards adopted by a team of 5+ developers, improving maintainability and developer productivity.
- Partnered with engineering leadership on architecture reviews, scalability planning, and technical roadmaps.

Full Stack Developer

eBuilders · Chennai, India · Jan 2017 – Oct 2017

- Developed enterprise web applications using PHP, Node.js, JavaScript, and relational databases.
- Designed and implemented REST APIs and backend services.
- Built Internet of Things (IoT) and automation solutions using Arduino and embedded hardware integrations.
- Contributed across engineering, development, testing, and deployment activities.

Embedded Systems Engineer

Simple Labs · Chennai, India · Jun 2013 – Dec 2016

- Designed and developed embedded hardware and firmware for industrial and commercial applications.
- Worked across the full product lifecycle, from design and development to testing and deployment.
- Built microcontroller-based systems integrating hardware and software components.
- Supported production deployments and troubleshooting activities.

EDUCATION

Diploma in Mechatronics

Nettur Technical Training Foundation (NTTF) · Vellore, India · 2010 – 2013

CERTIFICATIONS

- **Google Cloud Professional Data Engineer** – Google Cloud · 2024 – 2026
- **Certified Kubernetes Administrator (CKA)** – The Linux Foundation · 2022 – 2025 (renewal in progress)

LANGUAGES

English	Professional working proficiency
Tamil	Native proficiency
